TONINO LAMBORGHINI CASA
FORMITALIA LUXURY GROUP**

The finest leathers, excellent materials and skilled craftsmanship rigorously Made in Italy are the features of the new furnishings created by Tonino Lamborghini to interpret an idea of luxury with refined personality, forceful lines and dynamic forms, with finishes of the highest quality. The three-seat sofa, entirely covered in fine Daino leather, comes with sloping armrests enhanced by inserts in polished bronze-color coated metal. The tables, in four different forms and heights, have a base and lower shelf in champagne-color satin lacquered metal, and a top with irregular borders, available in marble or ceramic. In the armchair the structure combines titanium-color coated metal with handwoven parts in Brandy-color regenerated cowhide.

ORIGINE | DAVIDE GROPPI & GIORGIO RAVA | DAVIDE GROPPI

From the Latin "origo", start, birth, source, Origine appears like a bud emerging from the ground and soaring upwards towards the sky, with a stem that becomes increasingly thinner. It tells the story of the man's eternal thrust with respect to the universe, a stretched-out light that explores the infinite. Mysterious, enigmatic but comfortable, it combines the fascination of the unknown with the pleasure of a sophisticated and elegant ambient light. Designed to illuminate the façades of private buildings (outdoor version) as well as internal spaces (indoor version) with purity and personality, Origine sculpts and enhances every environment with its indirect light, which is intentionally non-invasive, graphic and fascinating.

SO | DAVIDE VERCELLI | FIMA CARLO FRATTINI

The new mixer with double control created by FIMA Carlo Frattini lets you choose the quantity and the desired temperature of water more effectively. The command is a cylinder cut in its longitudinal section, which has a slightly rounded end. The single-hole mixer has two rotary controls: the smaller, taller control regulates the temperature, whilst the larger, shorter one controls the flow. SO also stands out for its green characteristics thanks to the barrel which, with a diameter of 10 mm, limits the flow rate of water whilst still meeting the needs of daily use.
